**Like clockwork, the WHO has just declared Monkeypox a “public health emergency of international concern.”**

Anyone paying the slightest bit of attention to our rapidly declining world can see that we are headed for another (if not a series of) planned events. It will be fascinating to see how many Americans will submit this time around.

When we pulled back the curtain on COVID in 2020, few were ready to see what was being revealed. Today, most people have come to terms with the heartbreaking fact that we are the target of a very dark, anti-human, anti-nature, anti-family, and anti-God agenda. Those who have yet to see, don't want to see. As they say, “ignorance is bliss.” What they don't tell us is, blissful ignorance has an expiration date. Soon, even the mask wearers will be forced to see the harsh reality they've helped to create.

The question is, how bad does it have to get before we, the people, get off our asses and do something? Where are the men of this Nation? Where are the fathers? If you're one of the few who have given your life to this historic moment, God bless you! If you're one of the millions who have yet to stand up and speak out, what are you waiting for? Seriously. Gloves off.

What we're facing is nothing new. The masses have always been controlled by small groups of narcissistic tyrants. Go back as far as the cradle of civilization and ask yourself, “How did they do it? How did a few fat and flimsy royal types overpower thousands of behemoth slaves in an era prior to guns and surveillance?”

Answer: Mind control.

Not much has changed since then. However, what has changed is significant! Today, we have the ability to share information, person-to-person, on a global scale. The very technologies that are being used to destroy us can also be used to sustain us. What we have at our fingertips no people in history have ever had access to. We have the ability to be the first generation to stop history from repeating itself. Social media can be used as a weapon or as a tool. It is a bullhorn that can be used to amplify your voice or theirs. To spread your truth or their lies.

I've always found it fascinating that The Holy Bible states, "In the beginning was the word," and that the very first amendment of the US Constitution is about the protection of free speech. Our voices matter. YOUR voice matters. Now more than ever! Are you going to allow another round of assaults against your civil and human rights, or this time will you say something? Will you allow the discomfort of disagreeing with your friends and family to stop you from doing what you know is right, or will you stand in the fire in the name of love and life? Contrary to the plot of every Marvel movie, there is no superhero coming to save us. For well over 30 years, I've been studying the work of Joseph Campbell, who dedicated his life to mapping what he called The Hero's Journey. What Mr. Campbell discovered was that there's a common thread within the stories humans have been sharing since the beginning of time. It goes something like this...

An everyday person is confronted by a challenge between life and death. A challenge far too big for them to handle... or so they think. They set out on a quest to find a hero with the strength to take on the challenge. Along the way, they endure trials and tribulations that push them beyond their personal boundaries of self-imposed limitations. What doesn't kill them only makes them stronger. Ultimately, what they discover is, "the force is within. I am the one."

This is your journey. Your story. You are the hero you've been waiting for.
